YES

Do you want your texts to be SEO-optimized?

NO

Q Run Keyword Analysis first

Ensures you target the right keywords, discover ranking opportunities, and build content that can be found in search.

⊗ Skip Keyword Analysis

Best if your site is hidden behind a login, used for internal catalogs, or SEO isn't a priority. You'll still get quality content but without keyword targeting.

How do you want to run analysis?

⌚ One at a time (Single Analysis)

Great for testing or when you want careful oversight. Credits cost the same, but you only commit them one product at a time, reviewing each result as you go.

📦 Bulk Analysis

Ideal for large catalogs. Runs in the background while you work on other things. Results are ready when you return.

After analysis, how many products do you want to generate content for?

How many products do you want to generate content for?

📦 One product (precision & focus → Single Generation)

Best if you want to carefully optimize a high-value product, experiment with settings, or test the tool before scaling.

📦 Many products (efficiency & scale → Bulk Generation)

Best if you want to cover an entire category or catalog efficiently.

How much do you want to be involved?

Do you want speed or staged review?

🔧 High involvement

Add custom prompts, special instructions, extra product details, tone, and style. (Results are highly tailored but require more input from you.)

🔧 Low involvement

Provide minimal input and let WriteText.ai do the heavy lifting. (Faster, less setup, good for drafts.)

🚀 Full Automation

Runs keyword analysis, generates texts, and transfers in one flow. Best for efficiency and scaling.

📋 Step-by-Step

Split into bulk analysis → bulk generation → bulk transfer. Best if your team needs review checkpoints.

Do you want structured or flexible output?

Do you want consistency across products?

📄 With Template

Keeps consistent sections (Features, Benefits, FAQs). Great for polished layouts.

⊗ No Template

Freer paragraphs. Great for experimenting or quick drafts.

📄 Use Templates

Keeps layout uniform. (E.g., all clothing products share one format.)

📄 Category Templates

Different structures per category (e.g., jewelry vs. apparel).

⊗ No Template

Quick drafts without structure.

Generate → Review → Transfer to your store.

Do you want extra enrichment?

🔍 Enable Product Research

AI fills gaps for products with sparse data.

⊗ Skip Research

Faster for products with full info.

How much do you want to be involved?

🔧 High involvement

Add custom prompts, special instructions, extra product details, tone, and style. (Results are highly tailored but require more input from you.)

🔧 Low involvement

Provide minimal input and let WriteText.ai do the heavy lifting. (Faster, less setup, good for drafts.)

Do you want content to evolve over time?

🔄 Enable Keyword Optimization Pipeline

Texts update automatically as rankings improve.

⌚ Keep Static

One-time generation only.

END: Optimized product and category texts are ready for your store.
